COMPANY PROFILE

CERVIC ENVIRONMENT is part of the family-owned company CERVIC, S.A.® with 50 years of history. The national leader in Spain with presence in more than 30 countries worldwide.

Specializing in recycling bins and street furniture, Cervic Environment offer solutions characterized by their excellent functionality and reliability, combined with aesthetics that decorate and fit perfectly in the environment.

Our products have successfully passed functional and resistance tests under real conditions of use to guarantee their reliability and performance.

Certified by AENOR under the standard UNE 166.002 concerning innovation and development management, our department of engineering and design have received several awards from national and international organizations.

The hallmark and the strength of Cervic Environment is, without a doubt, our capacity and flexibility to develop custom products. Adapting our own products or creating an entirely bespoke design to suit the customer's particular needs.

From our manufacturing facilities in Spain, we design, produce and supply our products around the world.

LOOKS SMART, WORKS BETTER

- > Looks Smart, Works Better: design is more than the look of a product, design is how the product works. Our products have a great functionality and reliability, which gets very loyal customers.
- Easy Emptying System: bins must be safe, ergonomic and clean. This is why Cervic Environment design and produce all their bins with an ergonomic and efficient emptying system, wich minimizes the risk of ripping of the bag in the extraction.
- Extensive Range of products: Cervic environment has a large range of recycling/litter bins and street furniture with different levels of prices according to their performances.
- Neliability guaranteed: All our products undergo functional hard-tests reproducing real conditions of use.
- Solutions: Cervic Environment design and produce customized solutions. With great experience and several awards regarding the development of products under our belt, many customers are entrusting their projects to us.

CERTIFICATED SELF-EXTINGUISHING BINS

Cervic environment has one of the most extensive range of Self-Extinguishing bins.

Cervic Self-extinguishing bins, due to their specific configuration & design, keep the fire inside the bin (avoiding the fire to come out and spread). Additionally the Self-extinguishing bins turn off the flames in the inside by themselves, extinguishing the fire this way.

Specially suitable for public buildings and facilities such as airports, subway stations, train stations, schools, universities, etc.

Certificated by the Fire Lab Institute. All the bins have passed the test and have obtained the Self-Extinguishing Certificate according to the standards of DIN 31000:2011 and DIN EN ISO 13857:2008.

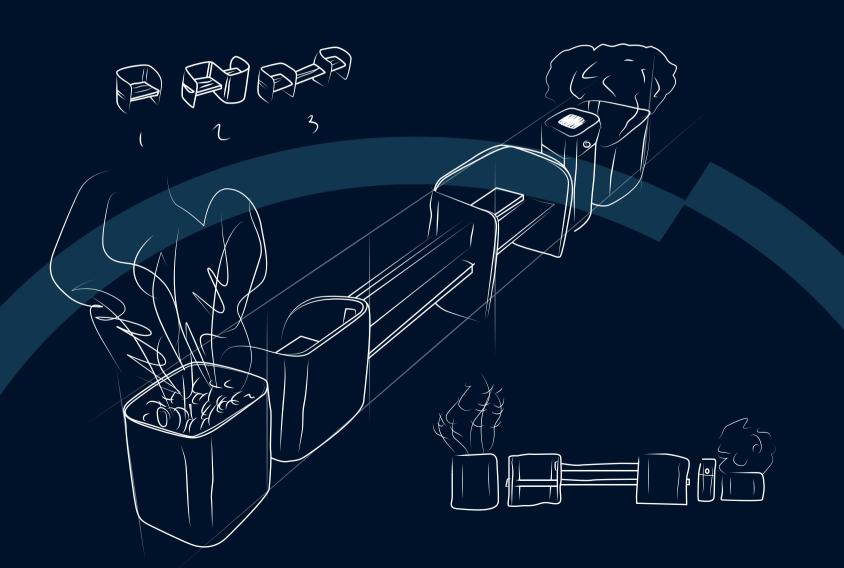

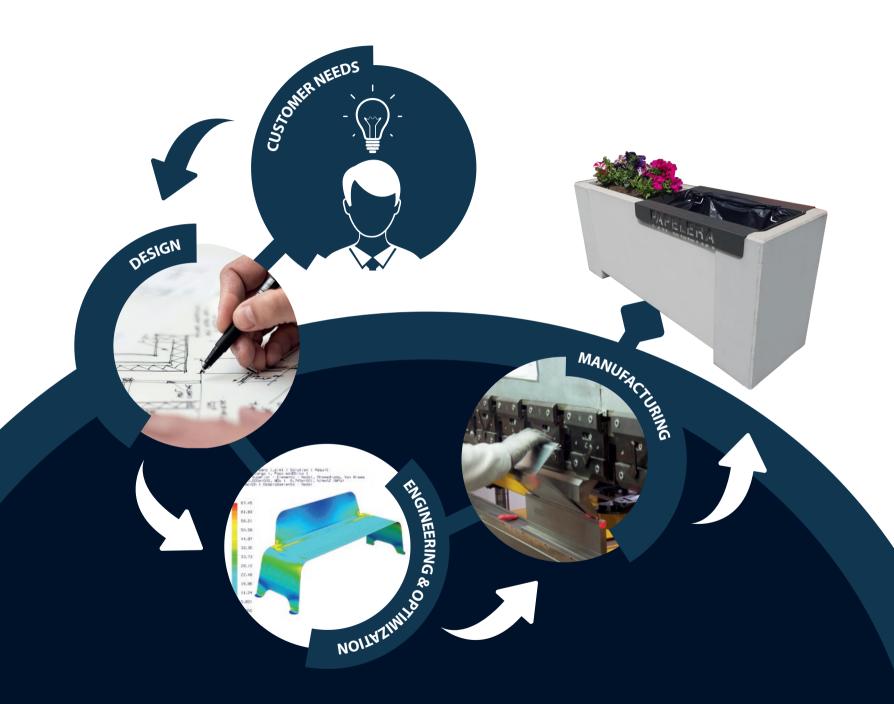

CUSTOM MADE PRODUCTS

PLASTIC BAGS "Slim Fit"

Full Range of Cervic Environment bins can be used with standard plastic bags.

Moving forward in our philosophy of creating Smart & Ergonomics products, Cervic Environment has created the "Slim Fit plastic bags", specially designed to be placed in our recycling & litter bins giving the following advantages:

- Great functionality, improving the efficiency of the bins taking advantage of the full capacity of the bins.
- Nice aesthetics of the bin as plastic bags are totally hidden.
- Dimensions of plastic bags are optimized, saving money and taking care of environment.
