

# ABOUT PUMPTRACKS

The construction of modular pumptracks is a new trend, which has come to Poland quite recently. Pumptracks – bike playgrounds – are used by kids of all ages. Suitable for children, teenagers and adults, they have become a great choice for active leisure activities. Specially shaped composite tracks with profiled corners are used for cycling, scooters, skateboarding and rollerskating. Riding on a pumptrack is a great training of motor coordination and sense of balance.

Pumptrack.eu is a brand of Techramps Group a company with a history of building sports facilities since 2003. For 13 years we have designed and constructed over 400 skateparks, pumptracks, snowparks and wakeparks. We employ the best specialists in the design and construction trade, combining passion with experience on a daily basis. ■

# SPECIFICATIONS

Modular Pumptracks have a 5-year warranty ■

Anti-slip layer for adhesion ■

Possibility to change track configuration and expand with new modules ■

The modular Pumptrack can be moved and used as an attraction at an event ■

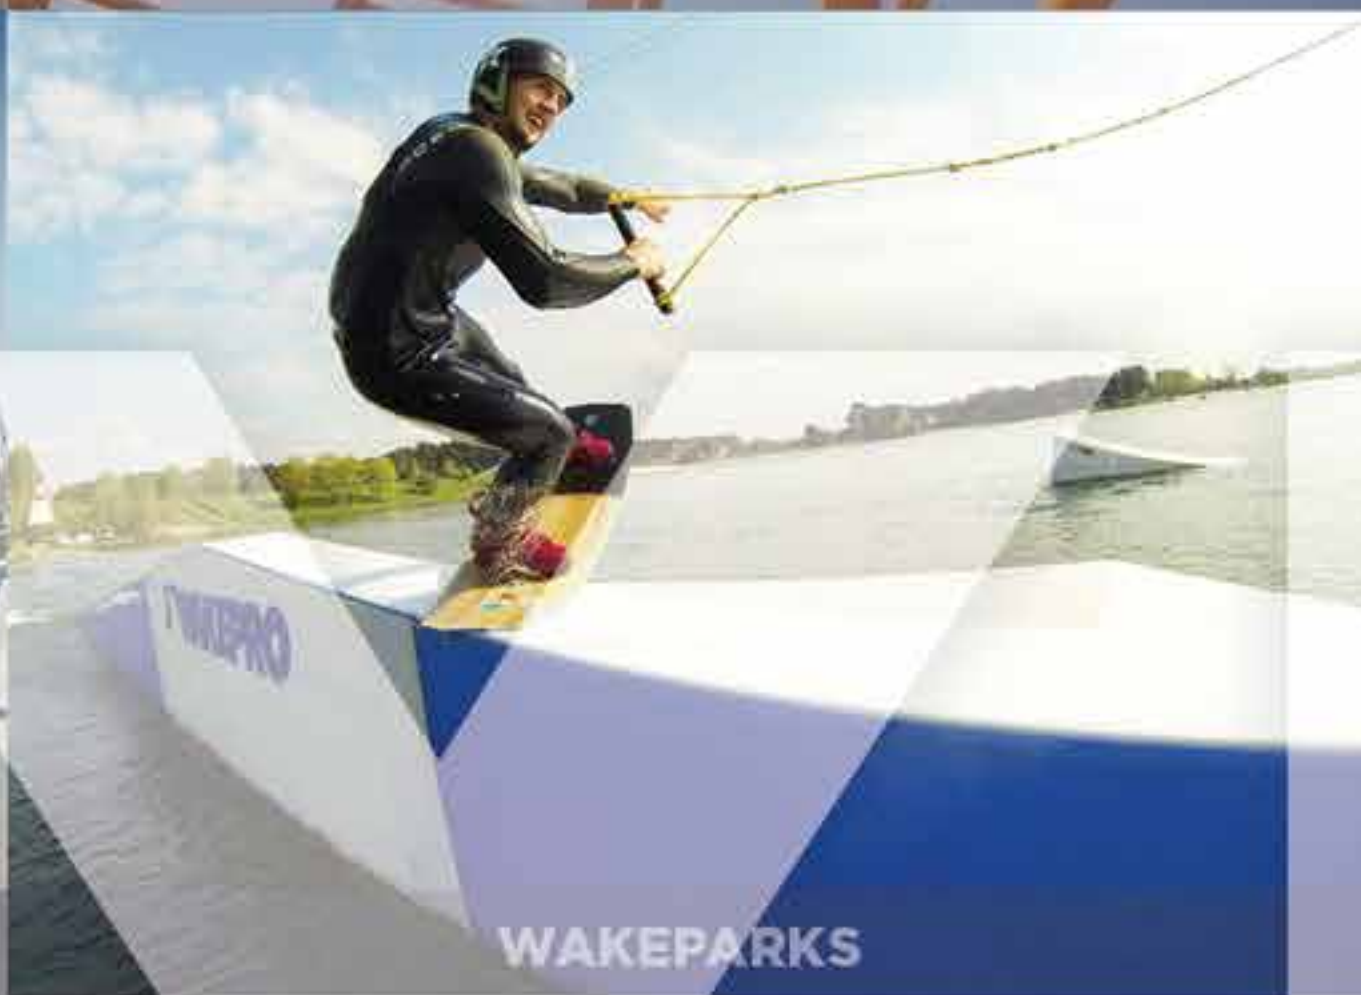

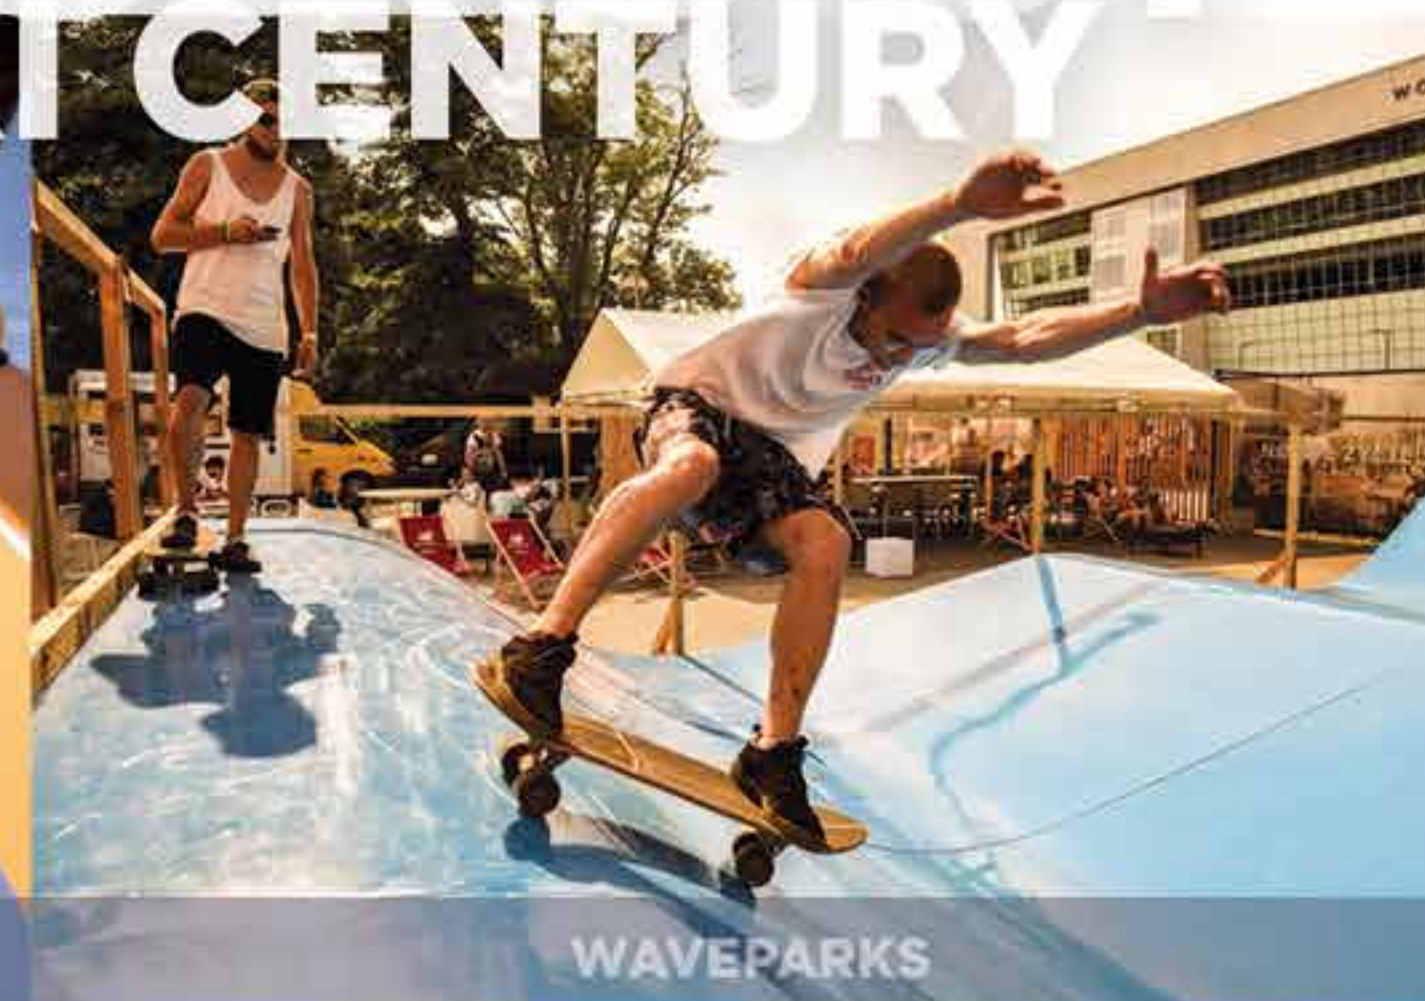

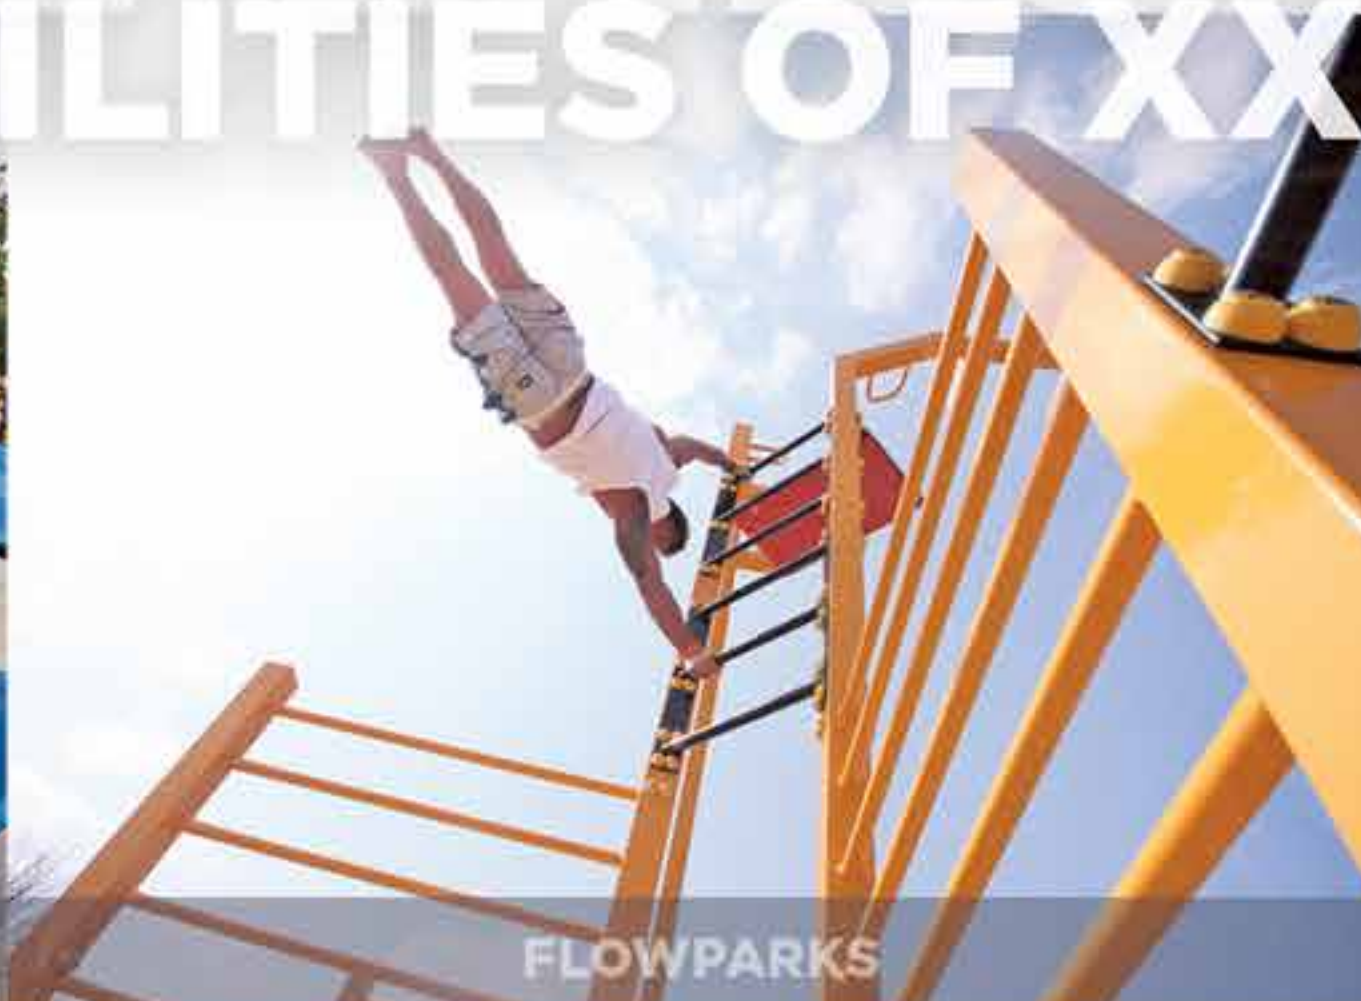

The highest quality materials ensure resistance to weather conditions ■

# MODELS

## ➤ PUMPTRACK MONZA PC1

Track length: 37 m

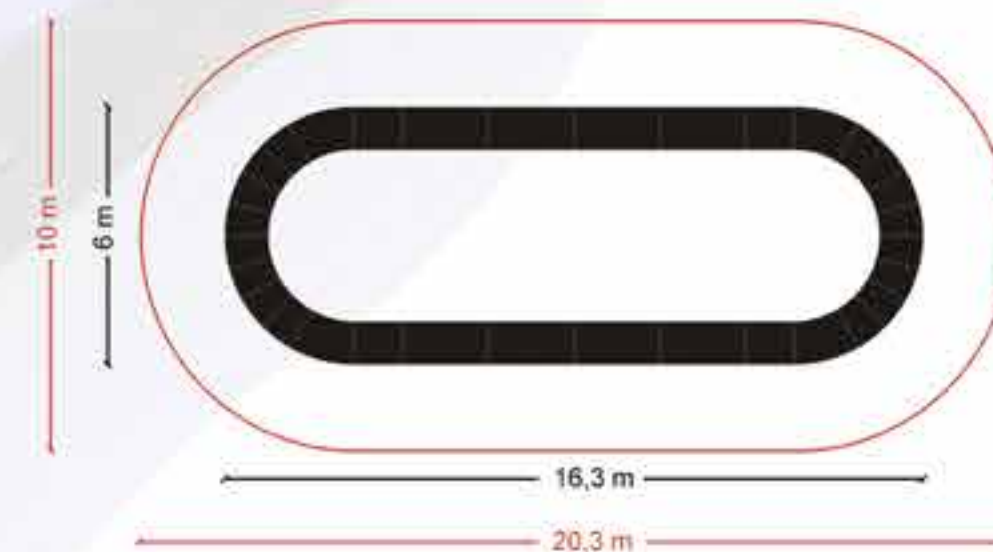

Surface area of the installation: 6 m x 16,3 m

Weight: 1470 kg

Available colours:

### SAFETY ZONE

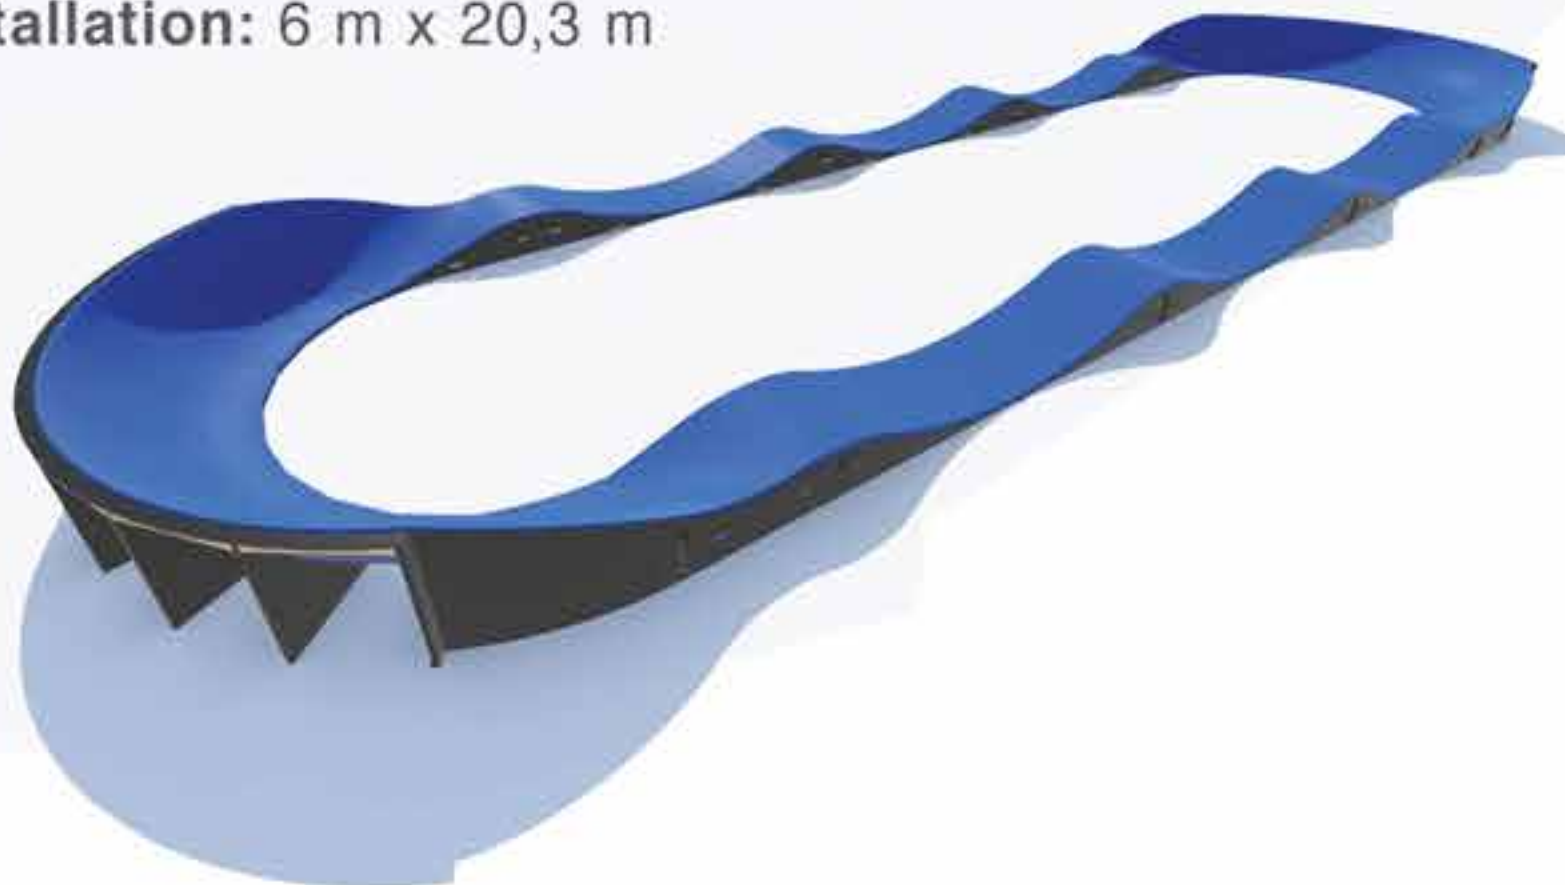

## ➤ PUMPTRACK SPEEDWAY PC2

Track length: 45 m

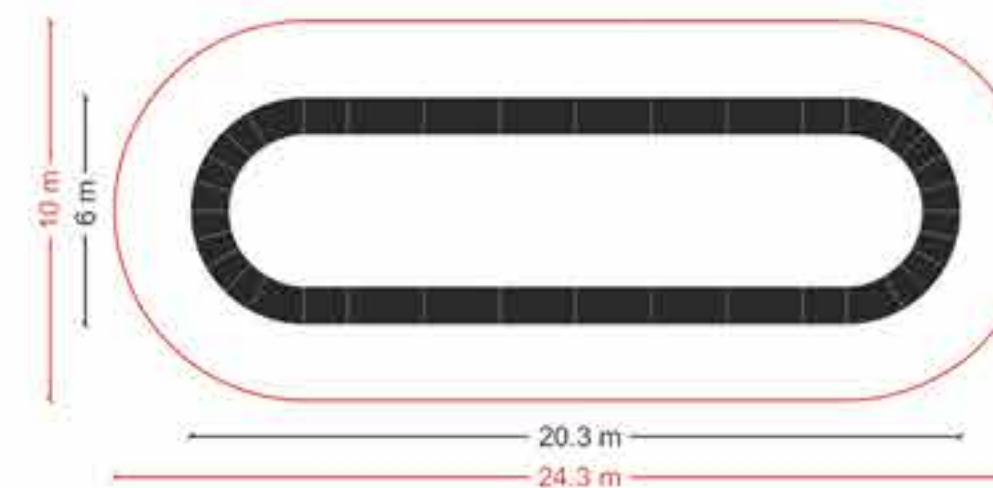

Surface area of the installation: 6 m x 20,3 m

Weight: 1730 kg

Available colours :

### SAFETY ZONE

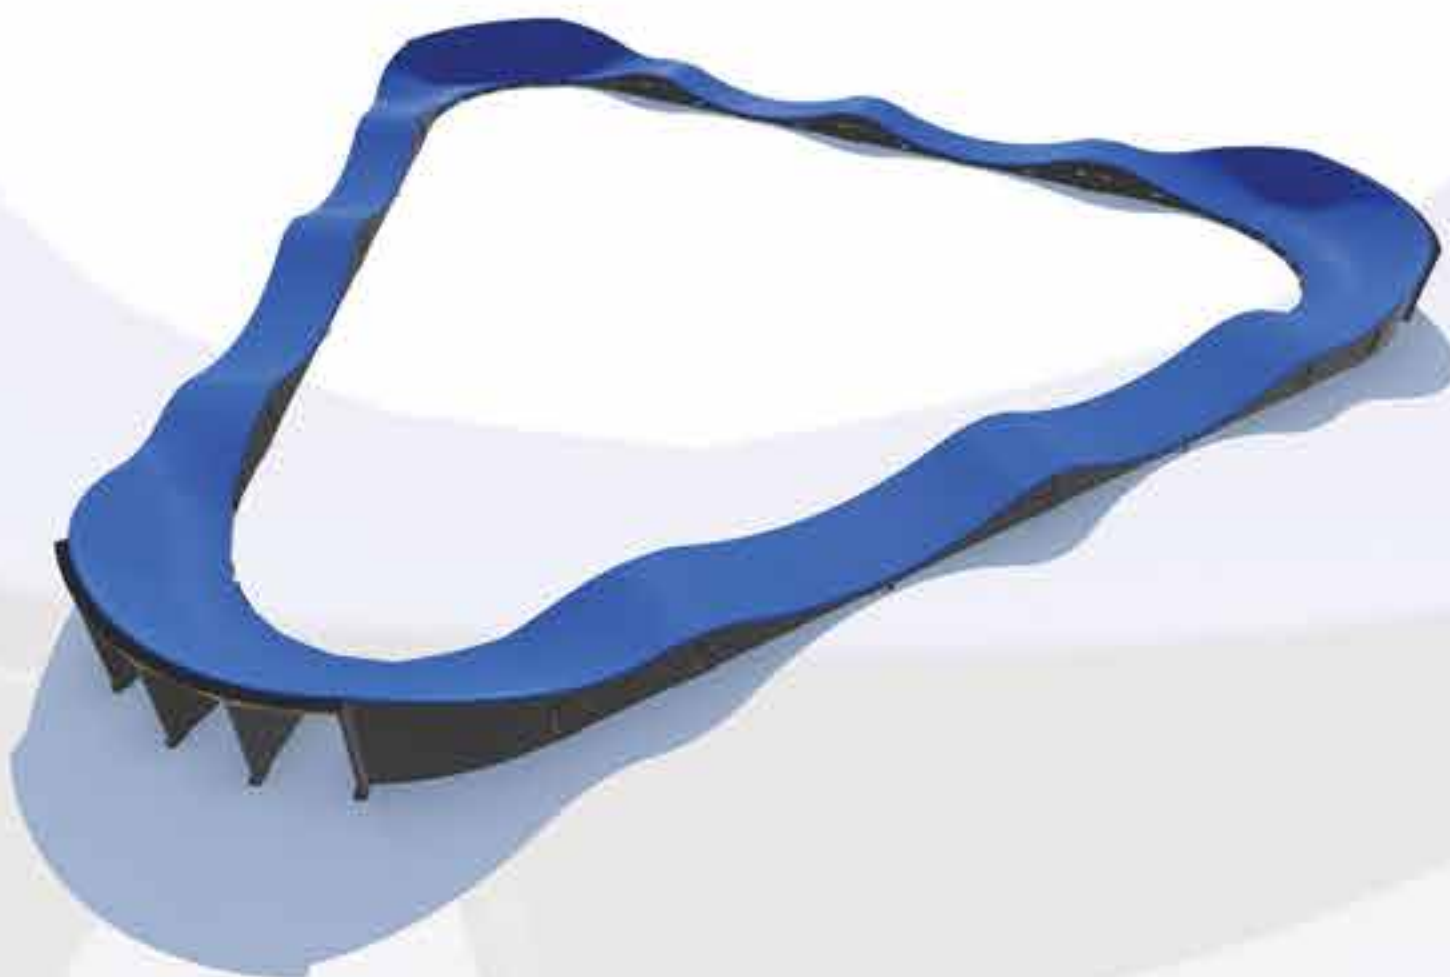

## PUMPTRACK TRIANGLE PC2A

Track length: 46 m

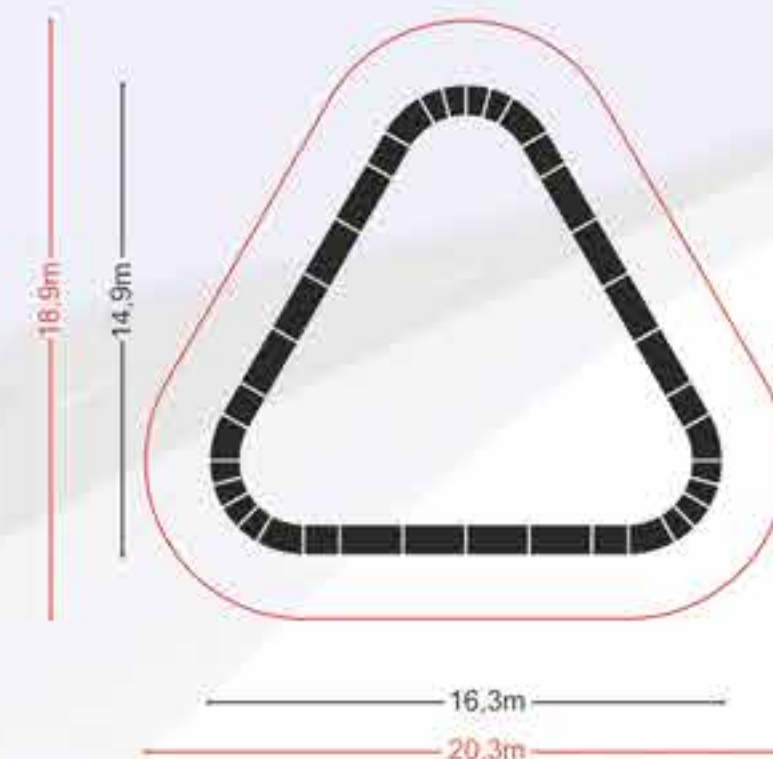

Surface area of the installation : 14,9 m x 16,3 m

Weight: 1760 kg

Available colours:

### SAFETY ZONE

## PUMPTRACK CASINO SQUARE PC2B

Track length: 53 m

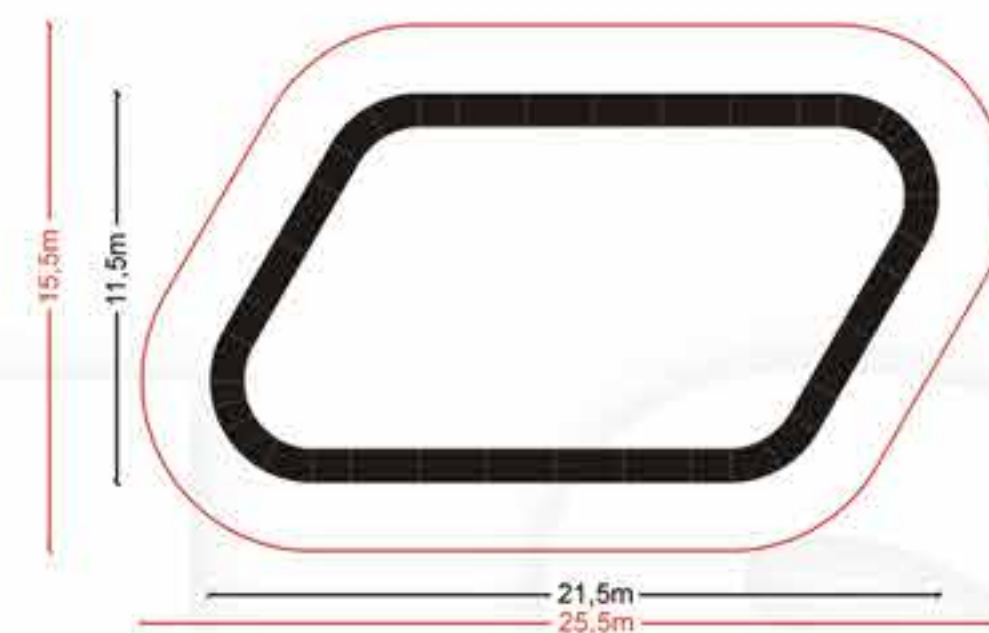

Surface area of the installation : 11,5 m x 21,5 m

Weight: 1940 kg

Available colours :

### SAFETY ZONE

## PUMPTRACK BROOKLANDS PC3

Track length: 60 m

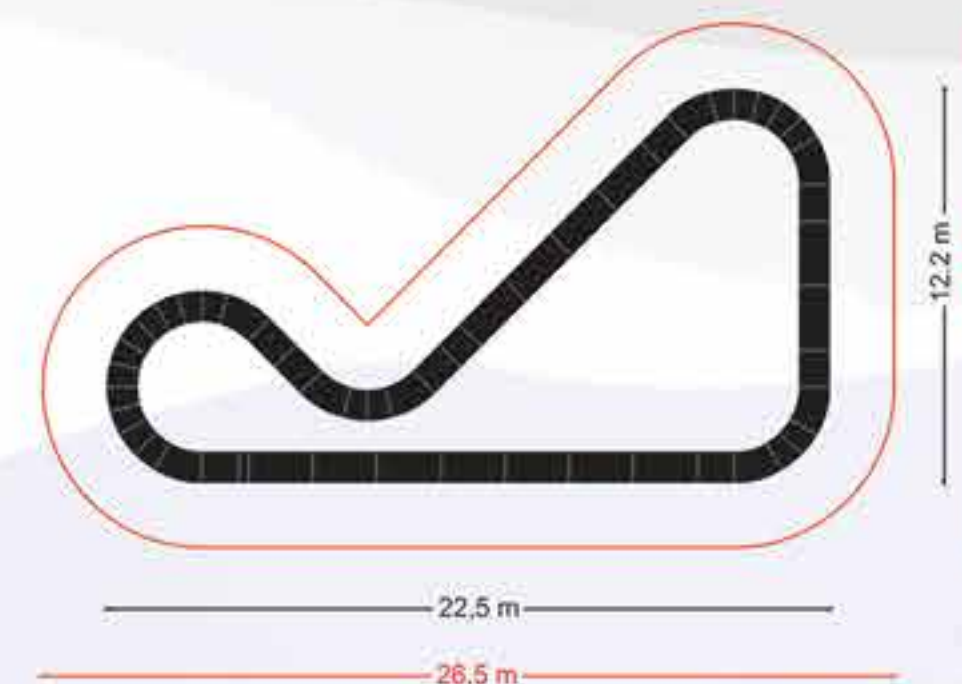

Surface area of the installation : 12,2 m x 22,5 m

Weight: 2360 kg

Available colours:

### SAFETY ZONE

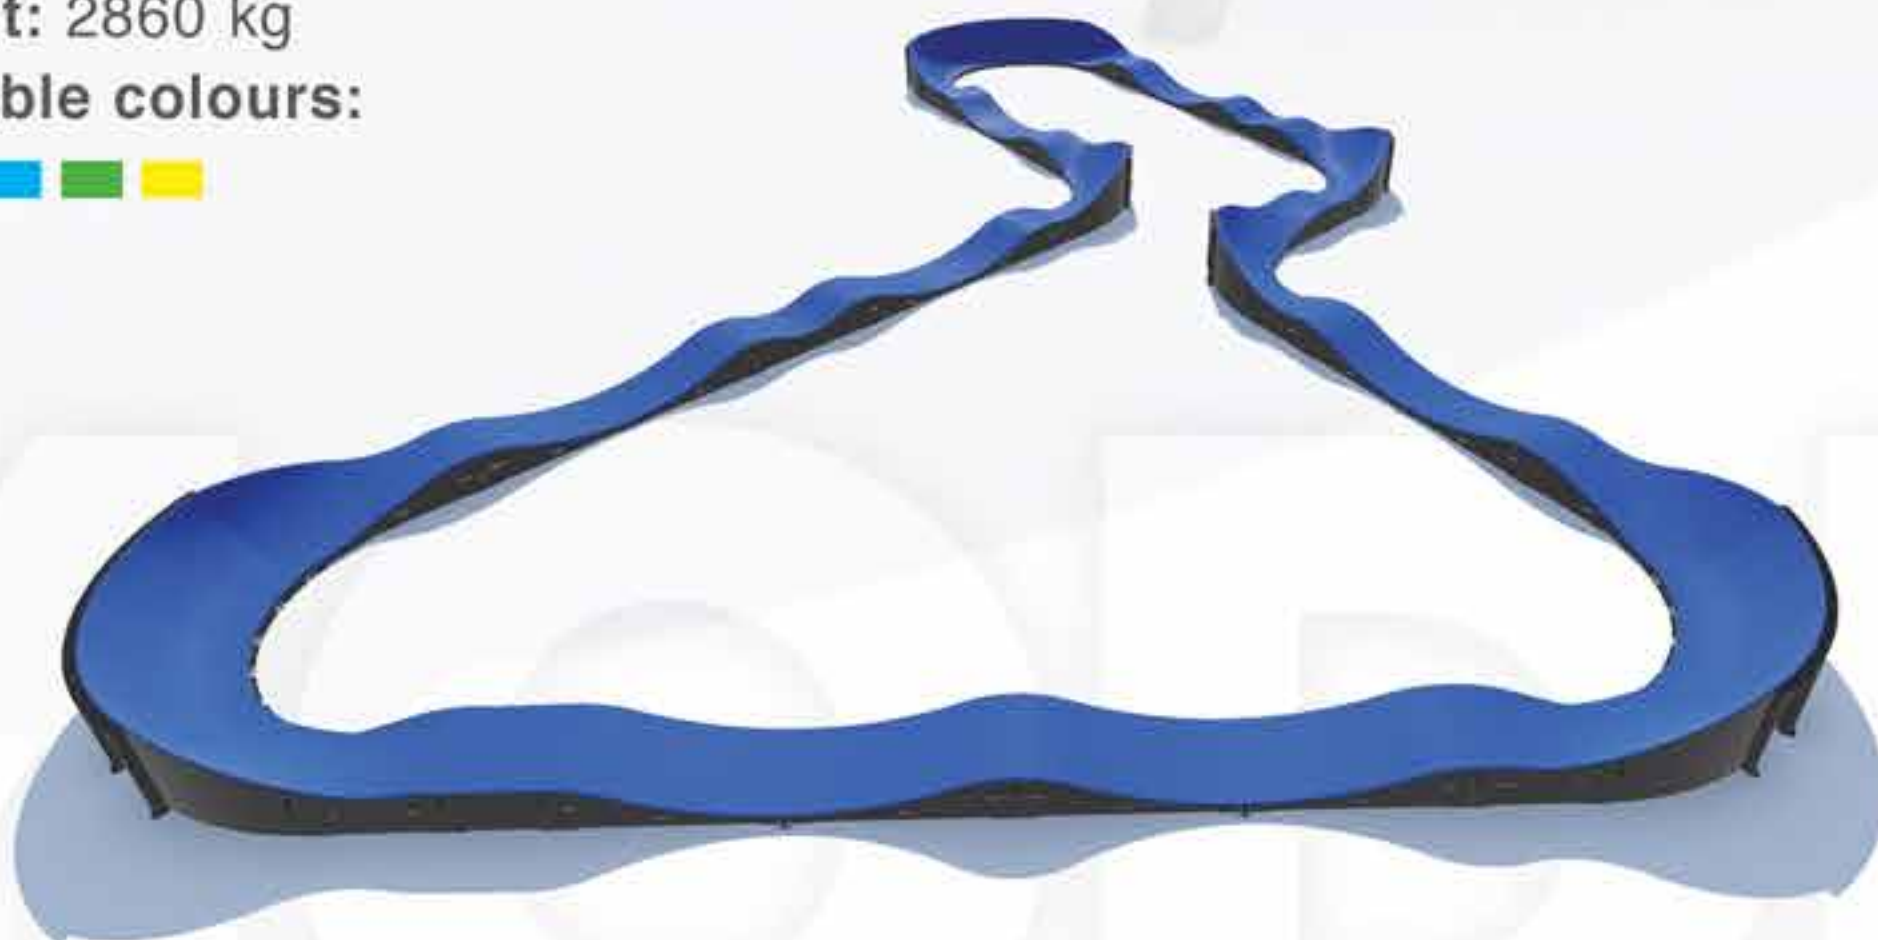

## PUMPTRACK AUSTIN PC3A

Track length: 75 m

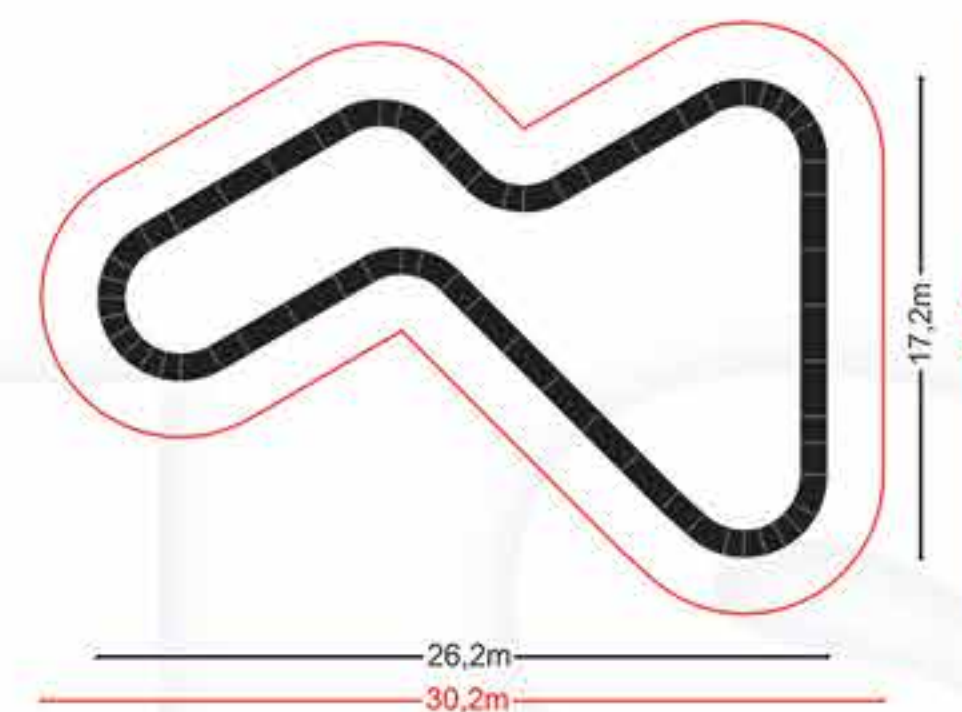

Surface area of the installation : 17,2 m x 26,2 m

Weight: 2860 kg

Available colours:

### LINE 3 DRAGWAY

Track length: 27,2 m  
 Surface area of the installation : 27,2 m  
 Weight: 1000 kg  
 Available colours :

#### SAFETY ZONE

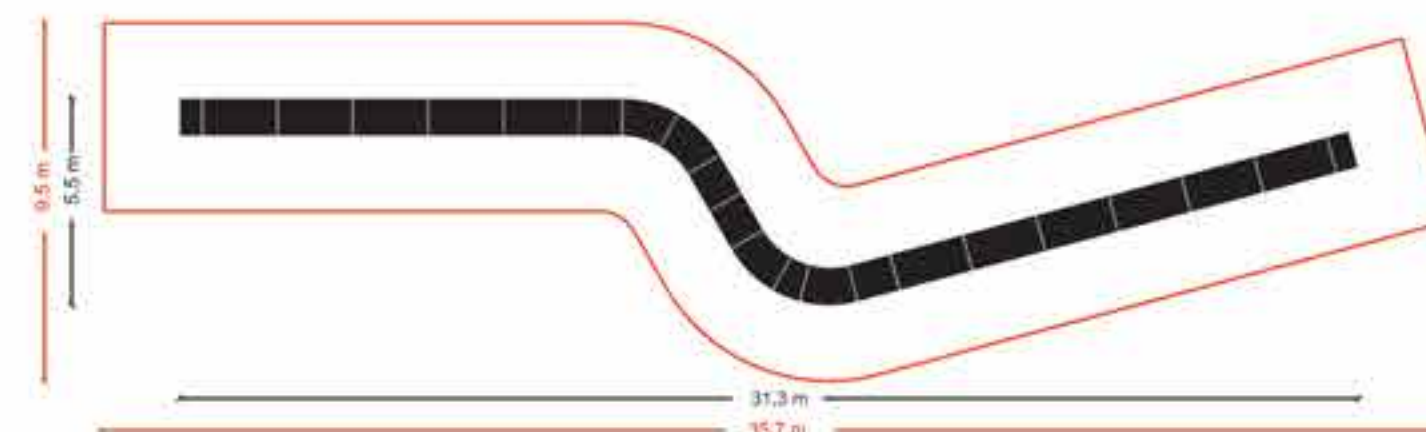

### LINE 4 CRAZY

Track length: 33,7 m  
 Surface area of the installation : 33,7 m  
 Weight: 1500 kg  
 Available colours :

#### SAFETY ZONE

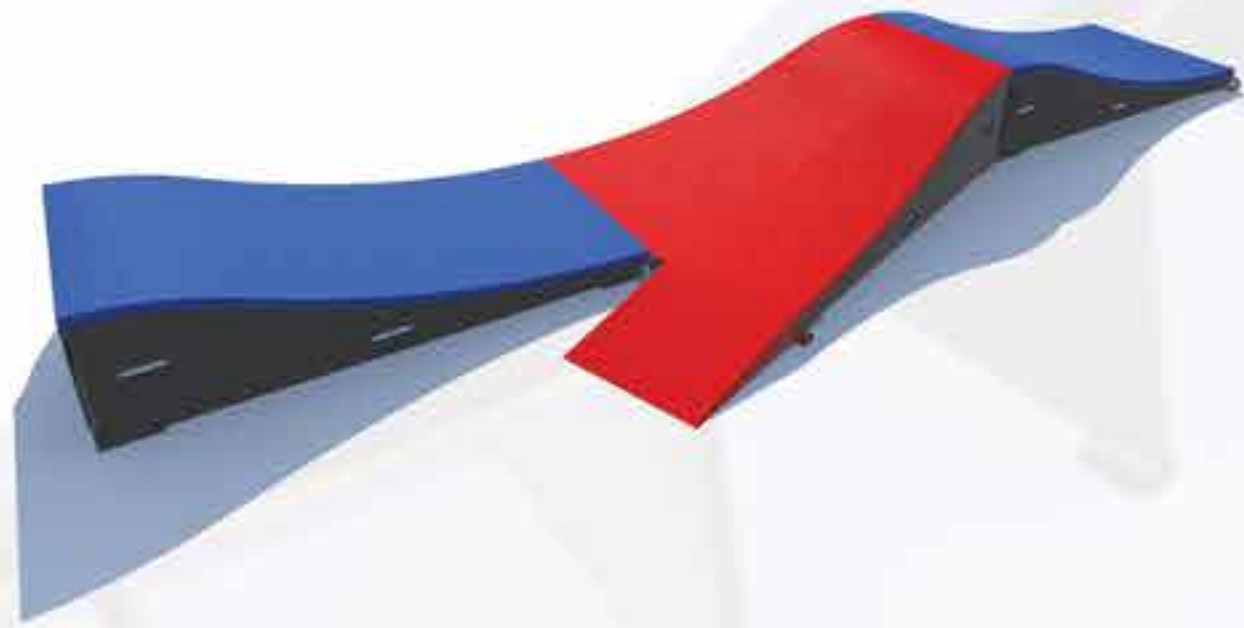

# NEW MODULES

## ↪ ENTRY MODULE

**Purpose:** This module ensures a smooth entry and exit from the pumptrack. It can be used on any of our tracks. Additional benefits of its installation include higher starting speed, smoothness and safety of all users using the pumptracks and of those who are joining in.

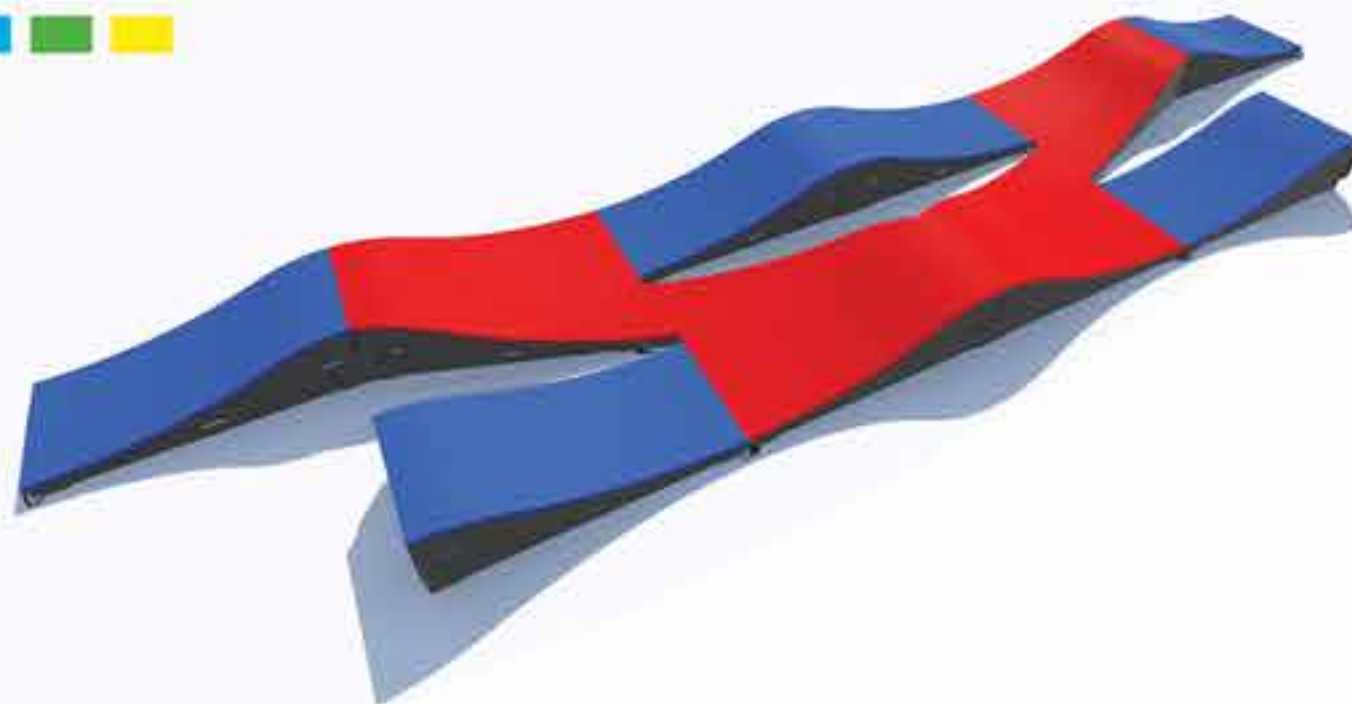

## ↪ STARTING RAMP

**Purpose:** Ensures smooth entry to the pumptrack allowing the user to reach the appropriate starting speed. This solution is especially helpful for beginners with a problem with gaining momentum as well as professionals who want to finish the track in the shortest possible time. The starting kit also serves as a starting platform for the organization of time races.

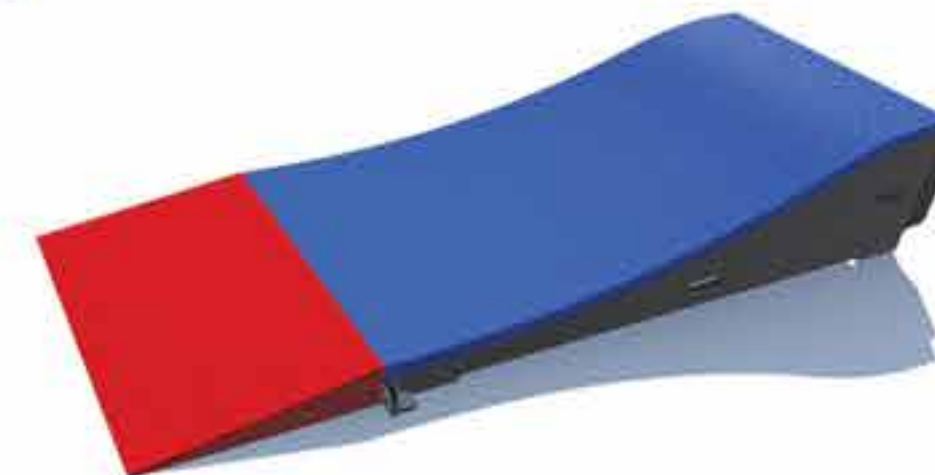

## ↪ SET OF CONNECTING MODULES

**Purpose:** A set of connecting modules allows two or more tracks to be connected together. This is an ideal solution for extending the existing tracks with new models or Lines and creating a unique track consisting of several smaller ones adapted to your terrain.

## ↪ OVERRUNNING PLATE

**Purpose:** Thanks to the modular system, each of our pumptracks can be freely configured in the future. Use the free modules to create your own Line thanks to the possibility of installing an over-running plate allowing for smooth entry from the ground.
