

PLAYNETIC

Human Powered Play

All Playnetic products are 100% human powered. The user generates the energy. There is no need for external electricity or batteries.

Playnetic products offer fun, exciting and challenging games through brightly illuminated push buttons or other forms of input.

Playnetic products can enrich the playing experience through LED lighting technology.

All Playnetic products are weather resistant.

All Playnetic products use MP3 coding format. This file is universal for audio. It makes it easy to create new content.

Several Playnetic products have a removable USB stick with MP3 audio files. It makes it easy to add new content.

All Playnetic products enhance the playing experience through beautiful audio design.

Foreword

Roy Stein, founder Playnetic B.V.

The Playnetic company has its roots in The Netherlands, in a beautiful city called Zutphen. Since its founding in 2007, Playnetic has branched out all over the world. We are proud to have created long lasting relationships with development partners and dealers all across the globe.

What makes Playnetic so special? All of our playground equipment is Human Powered, truly interactive, unique and fun! Playnetic is, and always will be, all about play. Human Powered Play to be exact.

Our products enhance any public space, playground or playing experience. This is achieved by incorporating audio, push buttons, LED lighting, games, education and great design into our products.

Playnetic playground equipment is Human Powered! All of our products and technologies are powered sustainably by means of Human Power, making an external power supply or batteries redundant. Users simply generate energy by playing: jumping, spinning or swinging.

Play is such an essential part in the development of every human being. Our products invite both young and old to get up and start moving in a fun and interactive way.

Roy Stein,
Founder playnetic B.V.
