3D PROGRAM

whole new play experience

It all began in 2012 with a simple idea: to give rubber surfaces a shape. What started as 2D graphics — playful additions to rubber surfacing — soon evolved into a bigger vision: creating something larger, more immersive, and with a greater play value. The goal? To transform flat rubber graphics into three-dimensional play elements.

Over the years, we've gone on to pioneer a unique category of 3D rubber play units that blend creativity, engineering, and fun. Our designs are now protected by trademarks and registered with the EU Intellectual Property Office.

3D PROGRAM

whole new play experience

DIVERSITY

With over a hundred unique 3D play units in our collection, we offer a wide variety of shapes and styles that go beyond simple play. Our products serve as playful sculptures that invite climbing, socializing, resting, and imaginative exploration — all in one. Each unit brings together creativity, functionality, and durability.

SAFETY

Safety is our top priority. Every 3D play unit is finished with a high-performance rubber surface designed to withstand years of use. All products meet the most rigorous international safety standards, including EN1176, ASTM F1487 and CAN/CSA Z614, and comply with EN71 and REACH for hygiene and material safety.

QUALITY

Crafted by hand in the Czech Republic, our products reflect attention to detail and a commitment to long-lasting quality. We use premium rubber granules and UV-stable aliphatic polyurethane binders to ensure vivid colors, strong structure, and resistance to weather.

DESIGN

Our 3D play units are thoughtfully designed to captivate children's attention and spark their imagination. Each piece encourages physical activity, social interaction, and creative play. To complement different environments, units can be tailored with custom color options.

CLASSIC

Our CLASSIC range features 46 unique play units designed to spark creativity and bring playgrounds to life. These vibrant 3D animal structures add a bold visual element to any space while offering children exciting, adventure-filled experiences.

Whether soaring through the sky on the back of a BEE, defending the playground from atop a mighty DRAGON, balancing on the tail of a CHAMELEON, or peeking over treetops from the lofty neck of a friendly GIRAFFE — each unit invites children to explore, imagine, and play in new and dynamic ways.

The large-scale, sculptural design of each animal creates an immersive 3D environment. Children can climb over, hide behind, or engage with the figures from all sides, encouraging active play and storytelling.

Let the CLASSIC 3D play units transform your play area into a world of discovery and fun.

Designed to perfectly complement the CLASSIC range, the MINI 3D play units offer 21 smaller-scale figures that are just as full of character and charm.

These compact companions bring even more variety to your play area, making them ideal for younger children or for filling in smaller spaces with big imagination.

Children can tuck themselves into the cozy shell of a MINI SNAIL, hop onto the back of a cheerful MINI TURTLE or explore the tentacles of the MINI OCTOPUS - every figure invites fantasy, creativity and play.

The MINI units encourage open-ended play in a more intimate scale, perfect for quieter corners or early childhood areas. Alone or alongside the CLASSIC range, they help create a richly layered environment where imagination knows no bounds.

NEW

The latest addition to our product portfolio, the LITE 3D range, is designed with flexibility in mind. These compact units bring playful character to even the tightest corners of a play area.

What sets the LITE range apart is its space-saving design that requires no safety zone, making these units ideal for smaller locations where every square metre counts.

Kids can climb over the friendly LITE OCTOPUS, perch on the bright LITE LADYBIRD, or imagine aquatic adventures with the LITE HIPPO. Despite their smaller footprint, each unit offers rich tactile and visual engagement, ensuring that imaginative play thrives – no matter the size of the space.

Designed to complement our 3D animal figures, the BASIC range adds texture, variety, and versatility to any play space. With shapes like MUSHROOMS, PALISADES and SPHERES, these units encourage open-ended movement, coordination, and creativity.

Children can leap from one PALISADE to the next, balance on curved surfaces, or gather around a cluster of MUSHROOMS for social play. With elements like the LITTLE BUILDER, they can even create their own imaginative landscapes — whether it's a castle, a fort, or a secret hideaway.

Simple in form but rich in play value, the BASIC range enhances the overall environment, filling in gaps, encouraging movement, and inviting children to create their own paths through the playground.

2D GRAPHICS

Say goodbye to dull rubber flooring – our 2D graphics turn any playground surface into a vibrant, engaging canvas. With a collection of over 300 ready-made designs and the option for custom creations, the possibilities for creative, themed environments are endless.

Crafted from high quality rubber granules and bound with UV stable aliphatic binders, our graphics are built to last. All materials meet the strict hygienic standards of EN71 and are free from polycyclic aromatic hydrocarbons (PAHs) in compliance with REACH.

Whether it's animals, numbers, roadways or abstract patterns, these 2D elements enhance visual appeal, support themed play and help guide movement throughout the play area.

Make your surface part of the story – with safe, durable and imaginative 2D graphics.

LET US DESIGN YOUR PLAY AREA

Your vision, our expertise.

Every space is unique, that's why we offer the possibility to design a play area tailored specifically to your needs, space and vision.

Whether it's a jungle full of giggles, a space station for mini astronauts, or a magical underwater world, we turn your vision into a colorful, exciting 3D design that's ready to play.

Tell us what you're dreaming of— the theme you want to go with, the age group you're designing for, the size of your space, and whether you prefer EPDM or TPV as your surface material. The more details you share, the better we can bring your vision to life in full color and creativity!

From cheerful farms to wild custom worlds, we'll shape your idea into a safe, modern, and super fun play area—indoors or out!

Let your imagination run wild.
We'll handle the visuals.

MATERIAL & COLOR OPTIONS

All of our products - 3D play units and 2D graphics - can be manufactured using either premium EPDM or high-performance TPV granules. Both materials are available in dozens of colors, giving you full creative freedom to bring your vision to life.

Looking for a pink elephant, an orange dog or a completely custom color mix? No problem. Our flexible production process allows you to choose any color combination, including our most popular pre-designed blends or something entirely unique to your project.

With endless possibilities in color and design, your play environment can be as bold, playful, or thematic as you imagine.
